00:25:28   Katie Ettman (She|Her):   Good afternoon all, here is a link to the resource Sarah referenced which provides an overview of food insecurity coding: https://sirenetwork.ucsf.edu/tools-resources/resources/overview-food-insecurity-coding-health-care-settings-existing-and

00:30:34   Katie Garfield / Center For Health Law and Policy Innovation: It will be available here: https://www.spur.org/events/2022-09-30/back-basics-medical-coding-food-based-interventions

00:33:08   Deepa Deepa Deshmukh: Is the recorded copy of this presentation available later?

00:33:30   Jackson Nutt-Beers / SPUR: Yes! A recording will be available in the coming days after the event ends. It will be posted on this page: https://www.spur.org/events/2022-09-30/back-basics-medical-coding-food-based-interventions

00:34:56   Jackson Nutt-Beers / SPUR: Have a question for our speakers? Be sure to submit your questions using the Q&A panel located at the bottom of your screen!

00:43:16   Kaye Barnes: So what is the ballpark timeline for this? The Whitehouse conference was this past Wednesday. How long until this trickles down to CHW's like myself?

00:43:47   Kaye Barnes: If that's even an appropriate question in this space.

00:44:34   Michelle Kuppich: Really fantastic job of communicating complex information. Thank you

00:44:45   Kristin Sukys: fantastic, Sarah!

00:45:03   Cathryn Couch: It sounds like the key next step is for the coaition of FIM providers to align on intervention definitions and design? Am i hearing that correctly?

00:56:45   Deepa Deepa Deshmukh: How do we get access to the data base of code that Gravity has out together

00:57:18   Alissa Wassung: CPT codes: 97802, 97803, 97804 and 98966, 98967, 98968 exist for MNT and assessments.

01:00:25   Brian Friedman: How does the screening/assessment connect to chronic illness response (such as (but not limited to) diabetes) in the coding?

01:01:25   Sonali Suratkar: Great!! Thank you!

01:03:04   Michelle Kuppich: Yes, RDNs can use CPT for MNT (e.g., 97802, 97803, 97804). LIcensure applies in several states.

01:04:13   Zoë Womack: For RDNs, if the state does not have licensure, can we still use CPT for MNT?

01:04:32   Brian Friedman: Is there a database publicly available to know what Payors would reimburse for specific codes?

01:07:42   Michelle Kuppich: The only publicly available fee schedules are Medicare and state Medicaid. Reimbursement is a separate topic. Reimbursement requires intersection of several factors including patient benefits, coverage requirements, network status of providers, and provider agreements.

01:08:53   Sarah DeSilvey / Northwestern Medical Center: https://confluence.hl7.org/display/GRAV/Social+Risk+Data+Elements+And+Status

01:10:08   Sonali Suratkar: Yes, that would be wonderful! Thank you!

01:10:17   Sarah DeSilvey / Northwestern Medical Center: Hi Sonali!

01:10:24   Katie Ettman (She|Her):   We will include all of these requests for information in a follow-up email. Thank you all!

01:10:40   Katie Garfield / Center For Health Law and Policy Innovation:

01:10:44   Erin Franey: Thank you so much! This was incredibly helpful.
01:10:45   Alexandra Alam El Din: Thank you! This had been very informative!
01:10:51   Kristin Sukys: Thank you!
01:10:54   Magda Weydt:Thank you
01:10:54   Kelly Naranjo:Thank you both!
01:10:56   Faith Bontrager: Thank you!
