

00:30:19 Jackson Nutt-Beers / SPUR: Welcome everyone! We want to hear from you! To submit a question for our panelists, please use the Q&A function at the bottom of your screen. For general comments, please use the chat!

00:35:36 Keri Akemi-Hernandez: Can you share how climate change is influencing immigration and the lack of compassion our government has towards those migrating from our Southern Border and the Caribbean? You shared that Billions of dollars are needed to adapt to climate change, but discrimination and privilege is compromising BIPOC the right to survival and adapting. How will you advocate for policy changes for Social justice and environmental concerns?

00:36:43 Erica Garaffo: It takes a lot of resources to go after Grants! The polished ones often get the awards, and that takes money and consultants

00:39:06 Mark Lubell: How much facebook should pay needs to consider more than just where the campus is located. what about all the transportation corridors along which their employees commute?

00:41:39 Erica Garaffo: Are there any state-led efforts to coordinate across regions?

00:45:37 Lauren Sommer / NPR: Hi Will! Facebook built a big expansion from the old campus. That's what I was referencing.

00:49:47 Lisa Messano: The California Department of Water Resources has an Integrated Regional Water Management program but it tends to focus more outside of the Bay Area.

00:50:42 Lisa Messano: The Bay Area Flood Protection Agencies Association has a strategic initiative to look at coastal hazards: <https://bafpaa.org/>

00:54:47 Jackson Nutt-Beers / SPUR: Have a question about the discussion so far? Use the Q&A panel to submit a question at the bottom of your screen!

01:00:46 Britton Schwartz: There is a Bay Area Integrated Regional Water Management Plan and coordinating group (under the DWR program that Lisa mentioned above), and they have completed an assessment of the needs of underserved communities as part of a program to increase community access to funding and involvement in decisionmaking (Ms. Terrie was very involved in that, among a lot of other wonderful folks). They have monthly public meetings. <http://bayareairwmp.org/>

01:03:16 Lisa Messano: At a national level, the Resilient Nation Partnership Network is holding a forum this month every Wednesday called Alliances for Inclusive Resilience Forum - great conversation about the centrality of trust and the importance of community-led efforts - <https://alliances-for-inclusive-resilience.heysummit.com/>

01:15:57 Harper (SPUR): Sea level rise and ground water invasion is occurring now. Whatever the estimates of sea level rise are, multiply it by 5. When it rains, it floods and all the buried problems of the toxic soup float to the surface.

01:17:40 Kristina Hill: Even if contaminants aren't at the surface they can move up into buildings thru pipes and foundation cracks. And it can happen w just a fives inches of SLR, not feet.

01:20:10 Gail Payne: Great job to all!

01:20:17 Shadeh Begian: Thank you!

01:20:22 Vishal Ream-Rao: Thank you

01:20:48 Kristina Hill: Thanks! Great discussion.

01:21:13 Michael Barber: The work around META is also part of a program that includes East Palo Alto: SAFER Bay Project <https://www.sfcjpa.org/safer-bay-project>

01:21:21 Britton Schwartz: Thank you!
