

00:17:29 Jackson Nutt-Beers / SPUR (They/Them): Welcome everyone! Thank you for joining us today! We'll have an audience Q&A towards the end of the program, so please submit any questions that come up using the Q&A Function located at the bottom of your screen!

00:20:36 Jackson Nutt-Beers / SPUR (They/Them): Learn more about the Soft Story retrofit program here: <https://sfgov.org/sfc/esip/soft-story>

00:24:56 Richard Bright: Are retro fit costs still tax free?

00:43:23 Saeed Fathali: Congratulations and thank you for the great work. I heard the goal of resilience and I heard we intend to achieve that to avoid collapse of these buildings. Life safety and preventing collapse are essential for a resilient community but without minimizing damage, the downtime and impact on resilience will still be staggering. Are you planning to incentivize or recommend going beyond just preventing collapse? This is what LA missed imho.

00:47:38 Andrea Wright: I live in a circa 1931 eight story concrete apartment building. 1. Is the list of buildings identified in that survey public? 2. Does the existence of parking space on the bottom of a concrete building exacerbate stability issues? 3. If you are concerned with earthquake safety, would it make the most sense to move out of a rental in a non ductile concrete building?

00:49:45 Jackson Nutt-Beers / SPUR (They/Them): Hi everyone! We really appreciate your questions! If you could please submit them using the Q&A function at the bottom of your screen so they won't get lost in the chat, we would appreciate it. Thank you!

01:10:06 Joseph Camajani: Thank you very much!

01:10:21 Jessica Finkel: Great presentation! Thank you!

01:10:23 Aaron Malatesta: thank you!
