An aerial photograph of a modern urban waterfront development. A bridge with a white railing spans across a dark blue body of water. On the right side, there are several modern buildings with large glass windows and balconies. The buildings are surrounded by greenery and walkways. The overall scene is bright and clear, suggesting a sunny day.

**BRIDGING
URBAN CHALLENGES OF
TODAY WITH SOLUTIONS OF
TOMORROW**

” The world has become too fast, too complex, and too networked for any company to have all the answers inside.

- Yochai Benkler, Yale University

Cross-sector collaboration

The domains....

Cities as Systems

Building circular material flows, reducing the use of virgin resources, zero waste, repurposing, regenerative buildings, life-cycle assessment, living and moving for longevity and planetary impact

Cities as Nature

Urban greening, re-naturing for urban regeneration, resilience, and climate neutrality

Cities as Communities

Health and well being, democracy, citizen inclusion models, local representation, shared living and communal life, new community-based ownership models, and inclusion of people of different ethnics, religions and nationality.

A BLOXHUB COMMUNITY

Co-creation, knowledge sharing and playfulness are the shared values among our member base of approx. 350 companies, science institutions, organizations and public bodies – all working with architecture, design, engineering, construction, facility management, tech or other fields related to sustainable urbanization.

We live in a 9.000 m2 co-working space in two neighbor buildings in the heart of Copenhagen with approx. 800 people. Between research and practice and between start-ups and corporates. We break down the silos to create better cities together.
