00:18:14   Jessica Peyton / SPUR Public Programs: Thank you all for joining! Share your comments and thoughts here in the chat!

00:19:28   Jessica Peyton / SPUR Public Programs: We also want your questions! Make sure you place them in the Q&A function at the bottom of your screen

00:30:49   Zvi Leve: @John Yi - thank you so much for raising the 'systems dynamics' and the multitude of stakeholders, often with conflicting priorities, associated with the sidewalk space. One aspect which often gets overlooked is network effects. In places where walking is pleasant, one can often walk significant distances without coming into conflict with motor vehicles (the cars are there, but they are kept away from walking corridors) whereas in most North American cities every single intersection is a conflict zone.

00:32:31   ian smith: Having done a few .... citizen tech projects ... I'd love to hear more about where to get access to this standard and these tools. Is there a link or email address to reach out at?

00:33:47   ian smith: Answering my own q, looks like tracmark@uw.edu is his contact address

00:37:57   Mark Hallenbeck: The UW's ITS4US project goes by the acronym the "TDEI." You can learn more about the project here: https://transitequity.cs.washington.edu/ We hope to be publishing tools (data collection, visualization, etc.) in the coming year. Most are still in development, but we a scheduled to have the full initial system up and running in a year. Tools will be available before that, but many of them are still in development and testing. We are also still writing and editing the documentation on how to most effectively interact with us. So - by all means please get in contact for details. - Mark

00:42:09   Jessica Peyton / SPUR Public Programs: We want to hear from you - Make sure you get your questions in the Q&A function so our panelists can address them!

00:54:43   ian smith: that sudden change i think speaks to what someone said earlier, that these (sidewalk questions) are not (just) technical problems, they're political ones

01:11:10   Jessica Peyton / SPUR Public Programs: Thank you all for joining! And to our fantastic panelists 🙂
