

Short Range Transit Plans

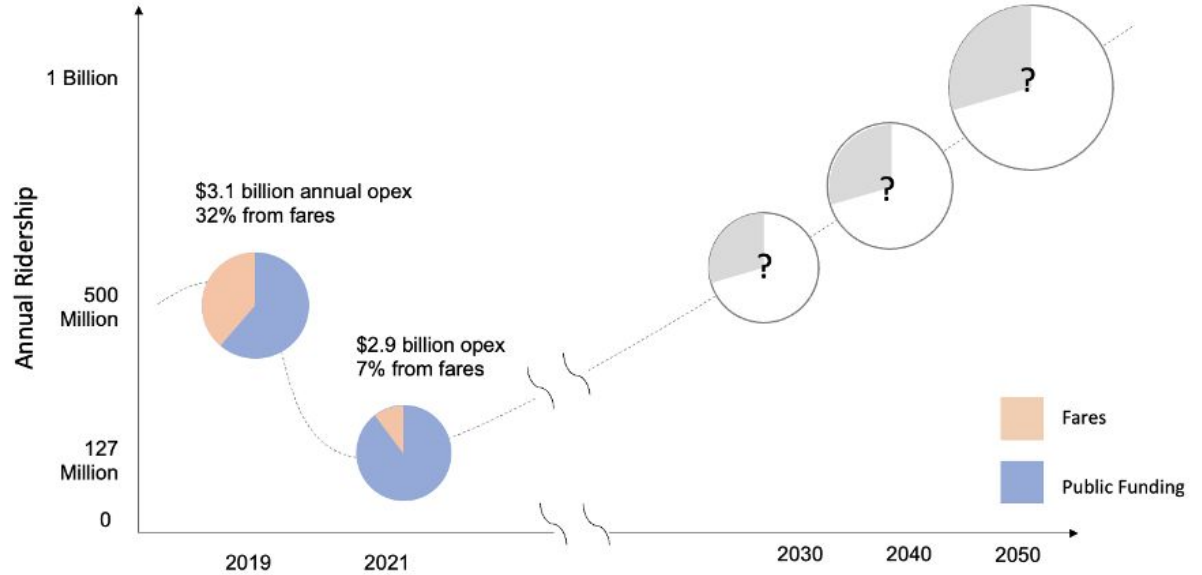

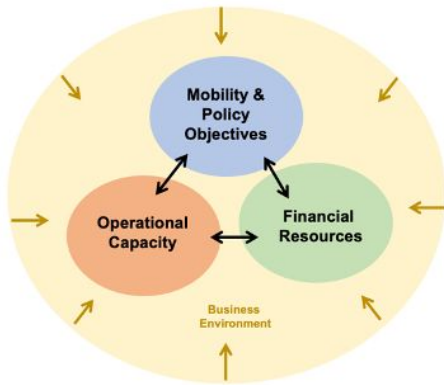

Produced by transit operators for the Metropolitan Transportation Commission (MTC) on a periodic basis

Provide an integrated outlook of each operator's future service levels, ridership, costs and revenues in a regionally standardized format

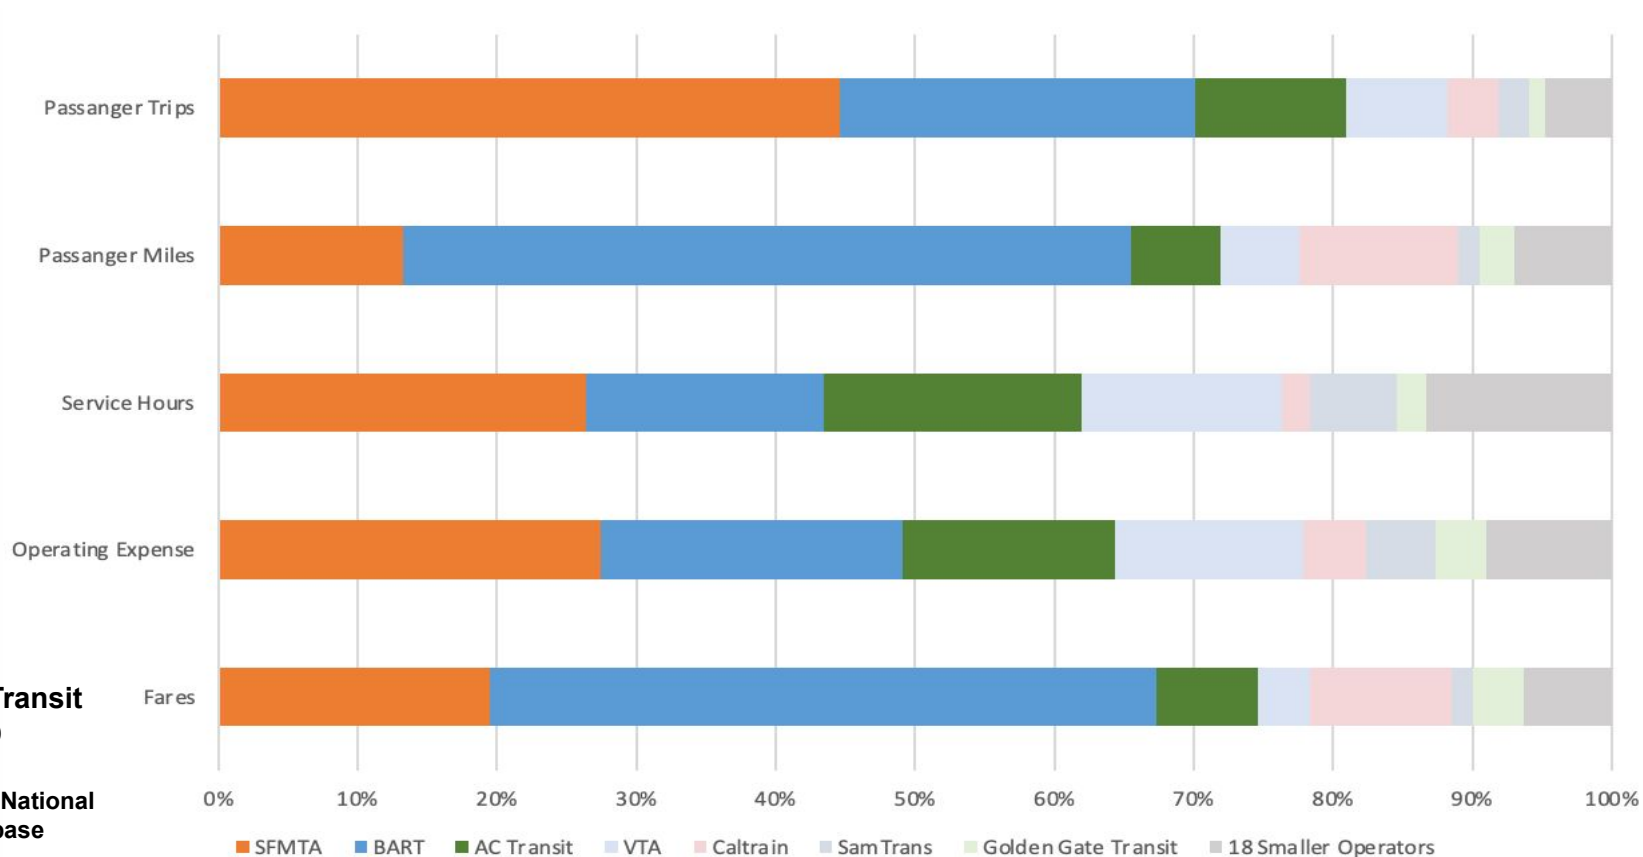

First post-COVID cycle of plans completed in late 2022 / early 2023. Changed format asked operators to consider multiple future scenarios in plans and shortened typical timeframe from 10 to 5 years.

Transit's Changing Business Model

SFMTA, BART and AC Transit
