01:04:40 Lisa Malul: What about maintenance of existing senior owned single family homes? This as a matter of affordable housing - aging in place for seniors and disabled individuals. The most affordable home is where they already live. And, there is no where for them to go.

01:06:36 valerie coleman: Do you anticipate the funding for housing preservation to go directly to cities/counties to then RFP out or is this funding available to community based organizations? After 5+yrs in this area, I've noticed that some jurisdictions have a better understanding of their community's preservation needs than others - seems like an important opportunity to create meaningful partnerships and develop a better understanding of that that need actually is). It's great news to hear preservation being lifted up with development and rental protections!
