

Upside-Down Urbanism

Gabriel Metcalf

Six program areas

Committee
for
Sydney

Economy:

Grow the economy, work to include everyone in it, and ensure that Sydney comes back from COVID-19 stronger than ever.

Mobility

Make it easy to get around, while reclaiming streets for public use.

:

Planning

Plan for a growing city in a way that improves quality of life and prosperity for all.

:

Resilienc

e:

Adapt to climate change and other threats.

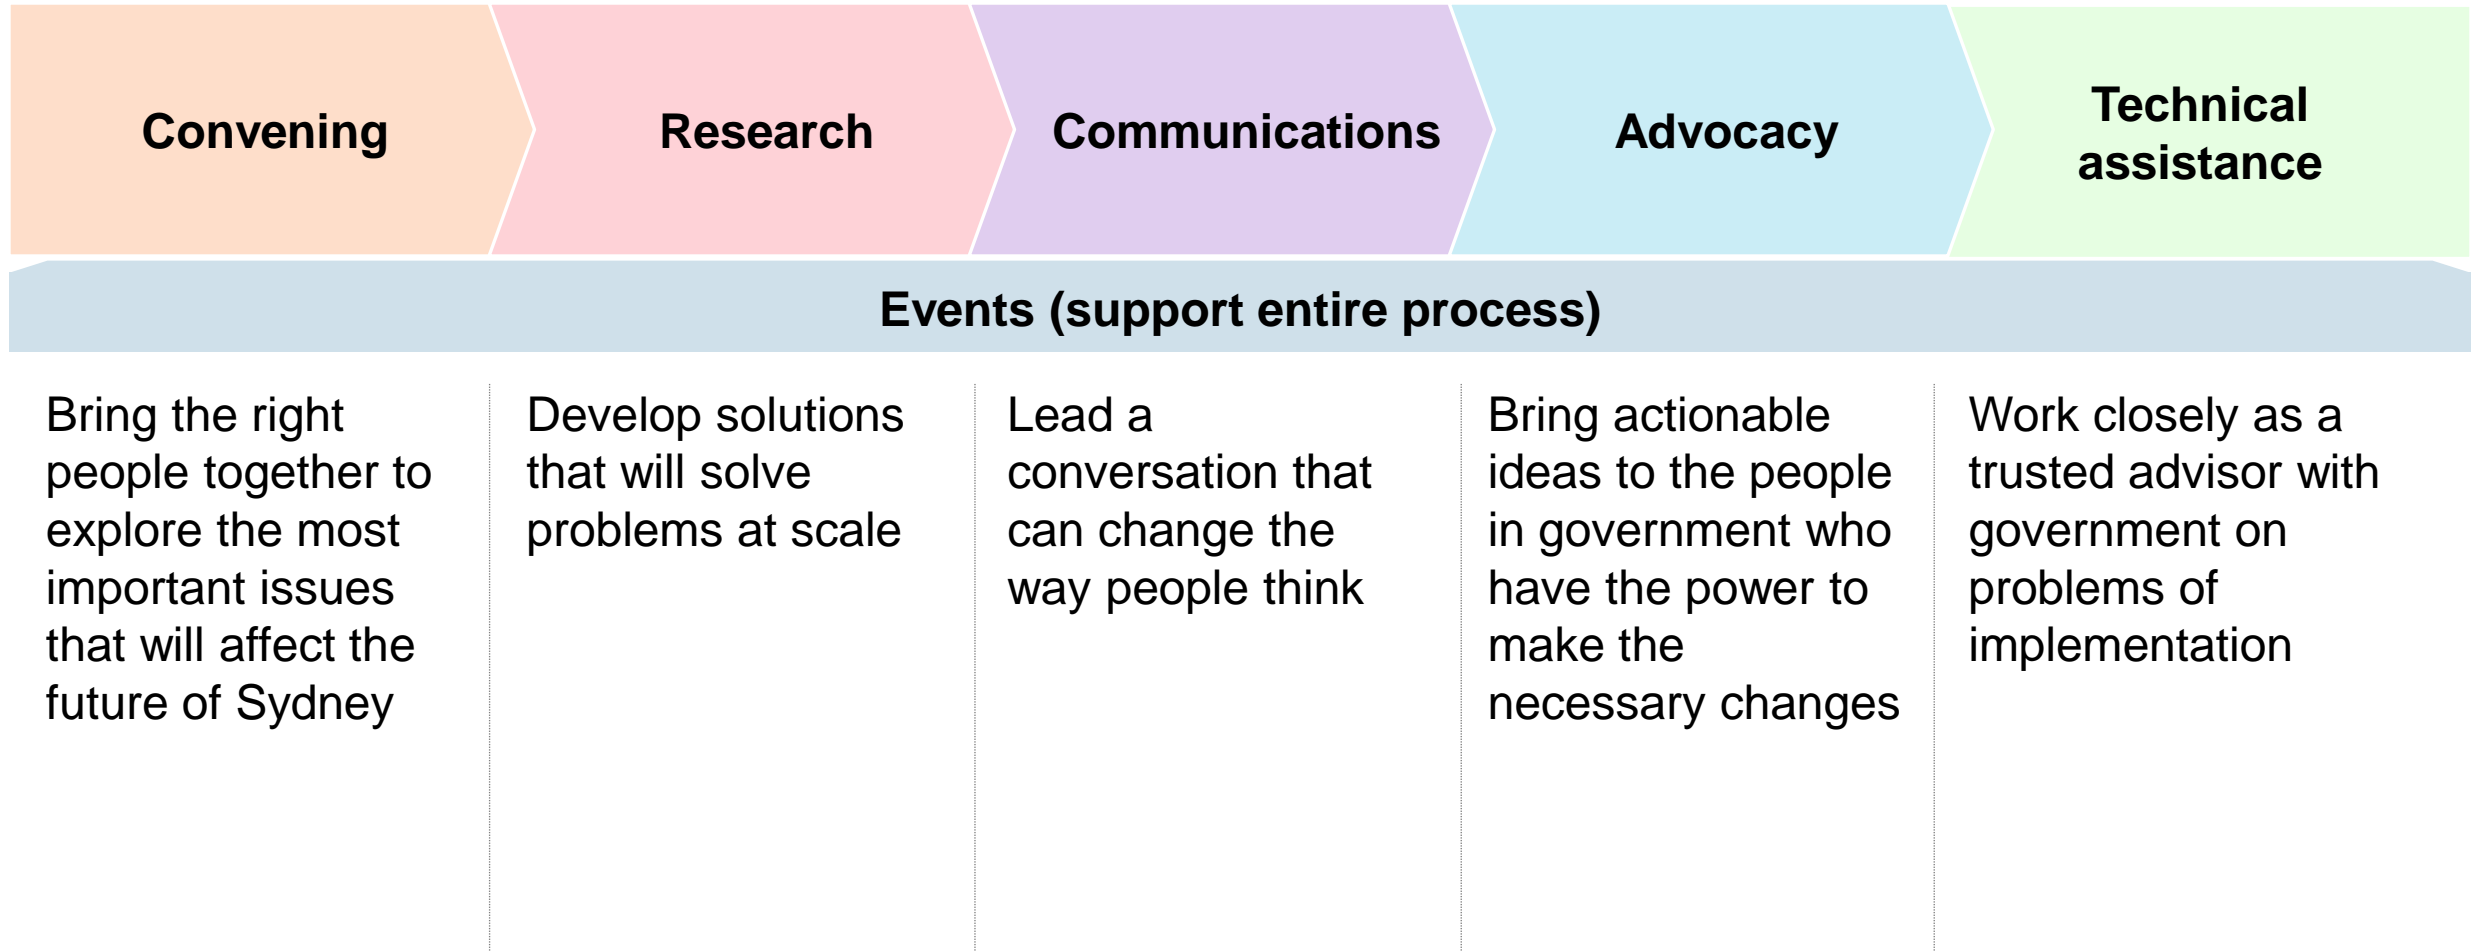

Culture:

Advance Sydney as a centre for culture and fun.

Governance:

Strengthen the effectiveness of government at all levels.

CFS theory of change

Precinct expansion

Westmead	400m	1,500m
Catchment (Ha)	33.1	410
Developable Land (Ha)	25.1	242.6
Dwellings	704	7,320
Population	1,972	19,894

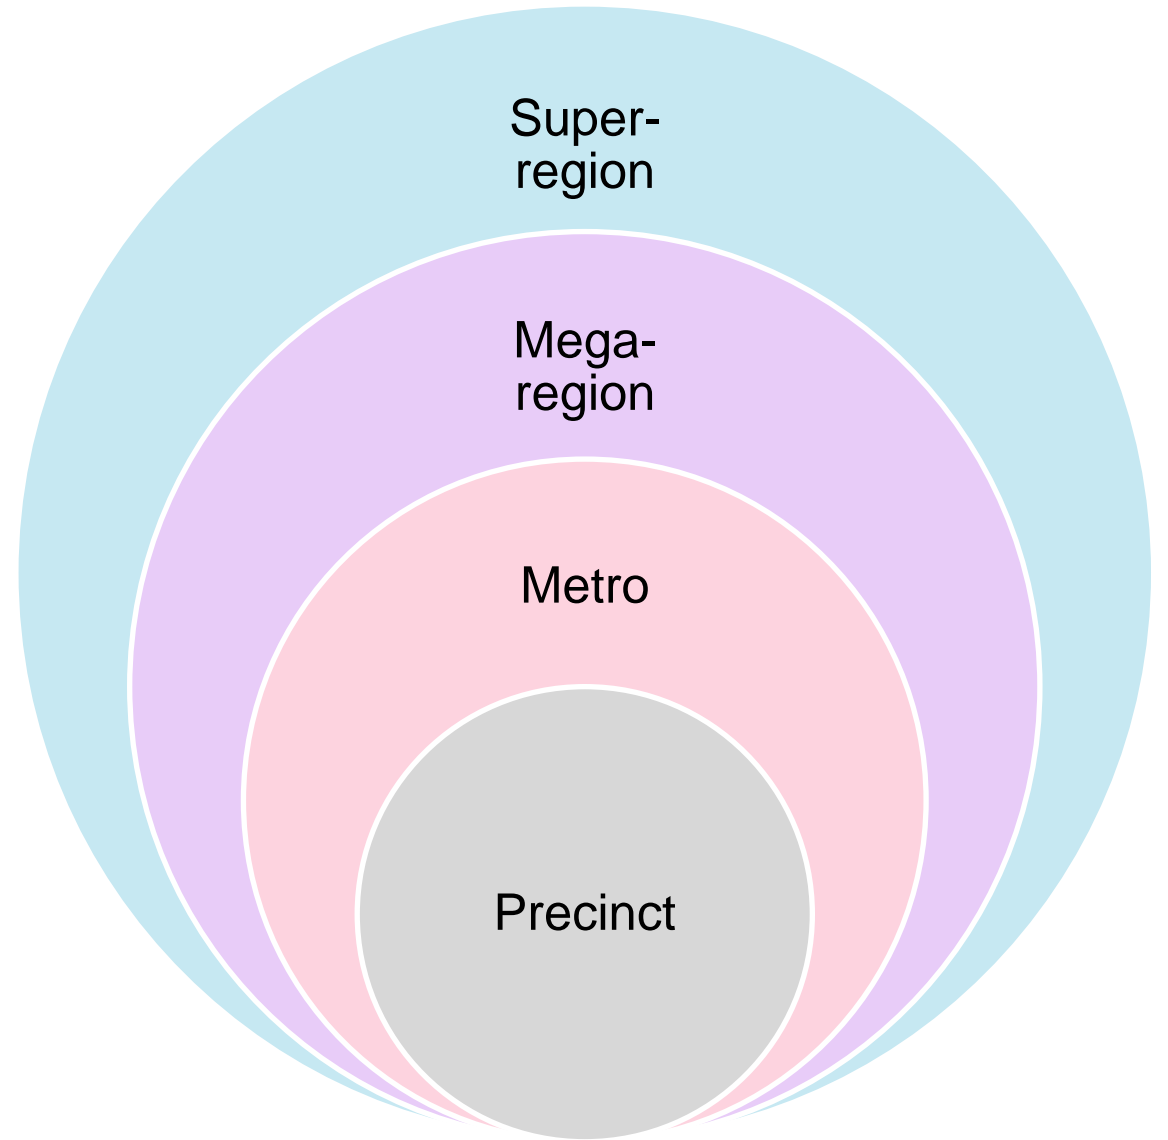

Epping	400m	1,500m
Catchment (Ha)	30.9	424
Developable Land (Ha)	22.4	340
Dwellings	557	5,457
Population	1,288	14,736

Five Dock	400m	1,500m
Catchment (Ha)	42.2	458.9
Developable Land (Ha)	40.6	367.4
Dwellings	969	7,248
Population	2,288	17,915

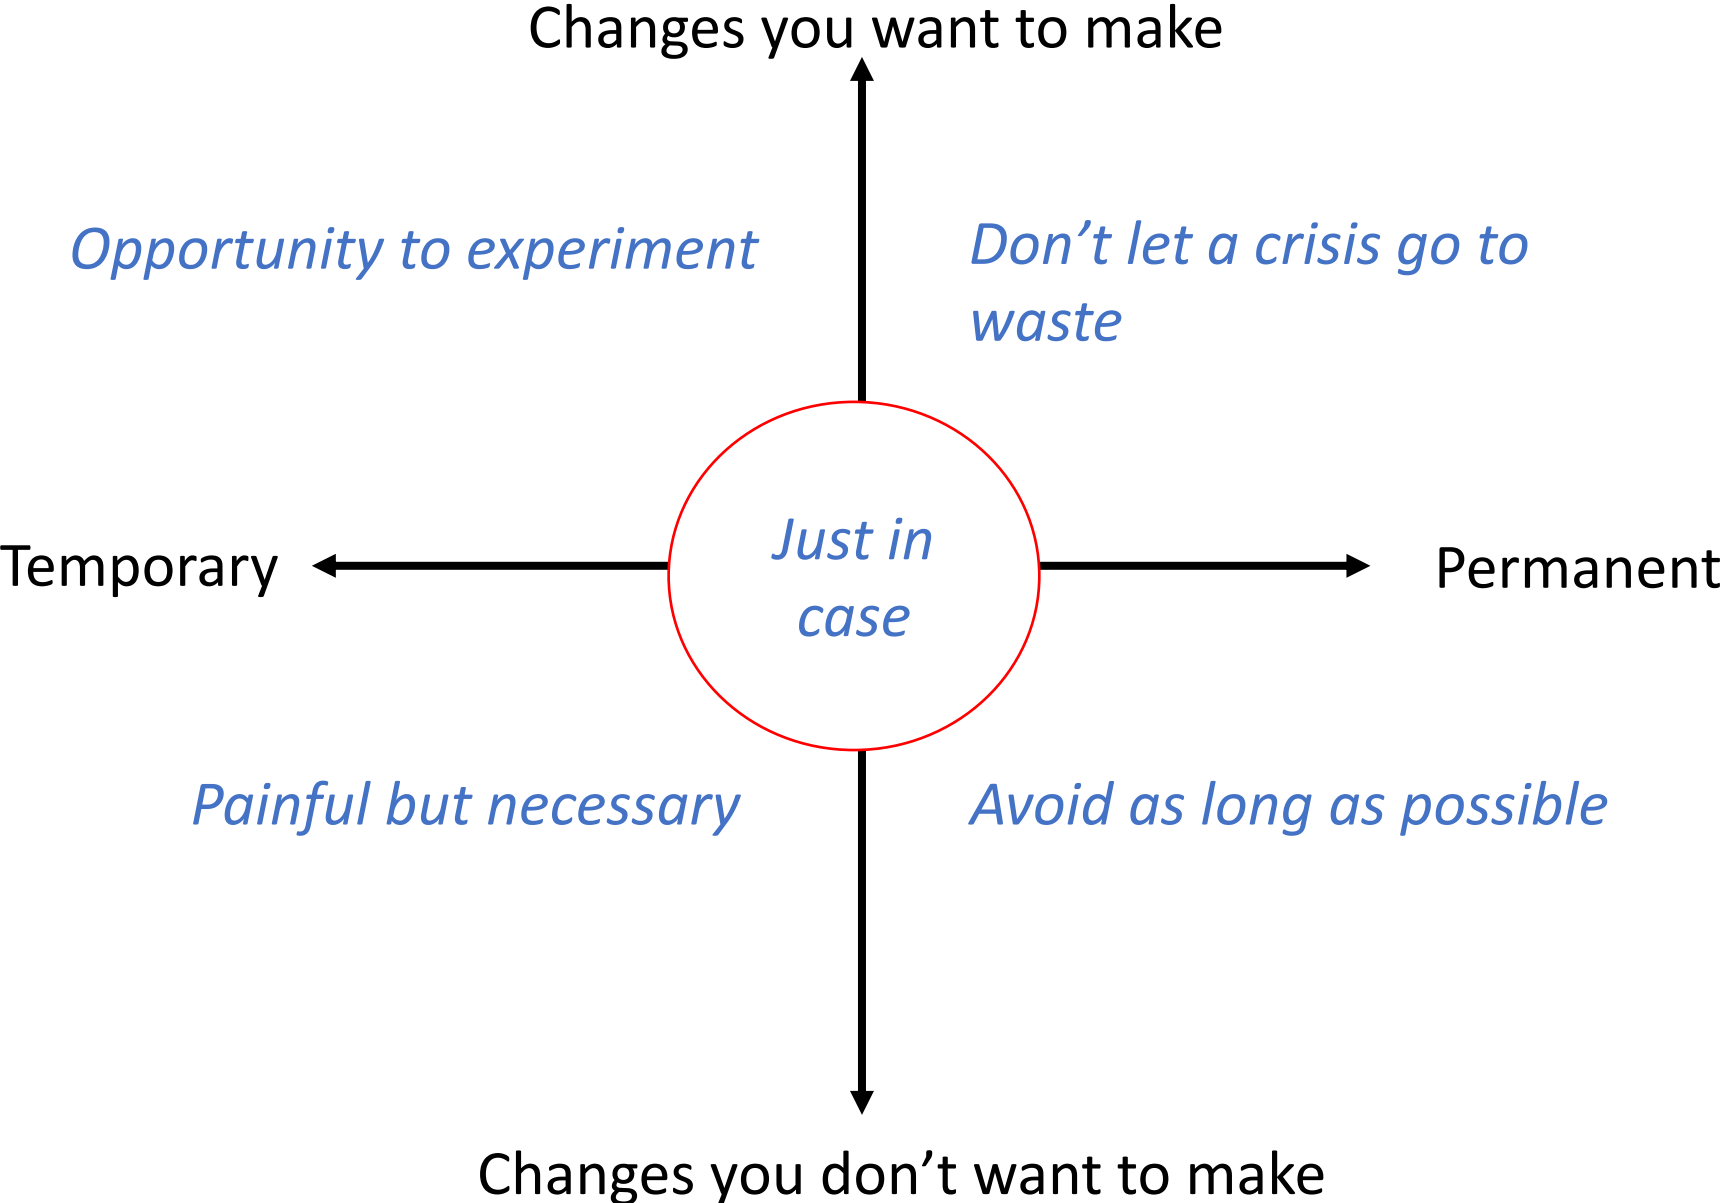

Precinct	Access by foot	Easy face to face meetings and un-planned interactions
Metropolitan area	Access by public transport and car	Extent of the daily commute = Shared labor market. Scale of economic clusters
Megaregion	Access by commuter train	Commuting or meetings 1-3 days / week
Super-region	Access by commuter flights — or by High Speed Rail	Fly for meetings and return same day Mobility over the course of a career

Five phases of the pandemic, revised

Conceptual framework for post-covid urban transformation

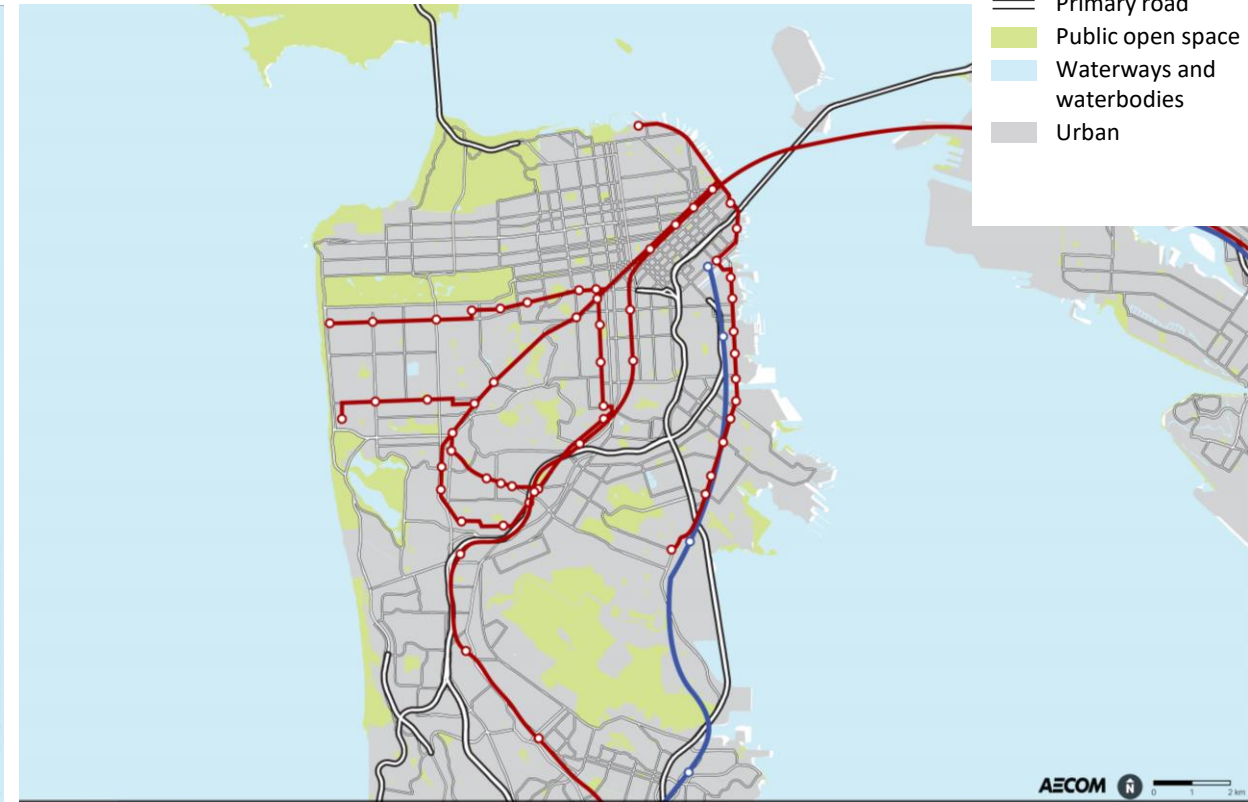

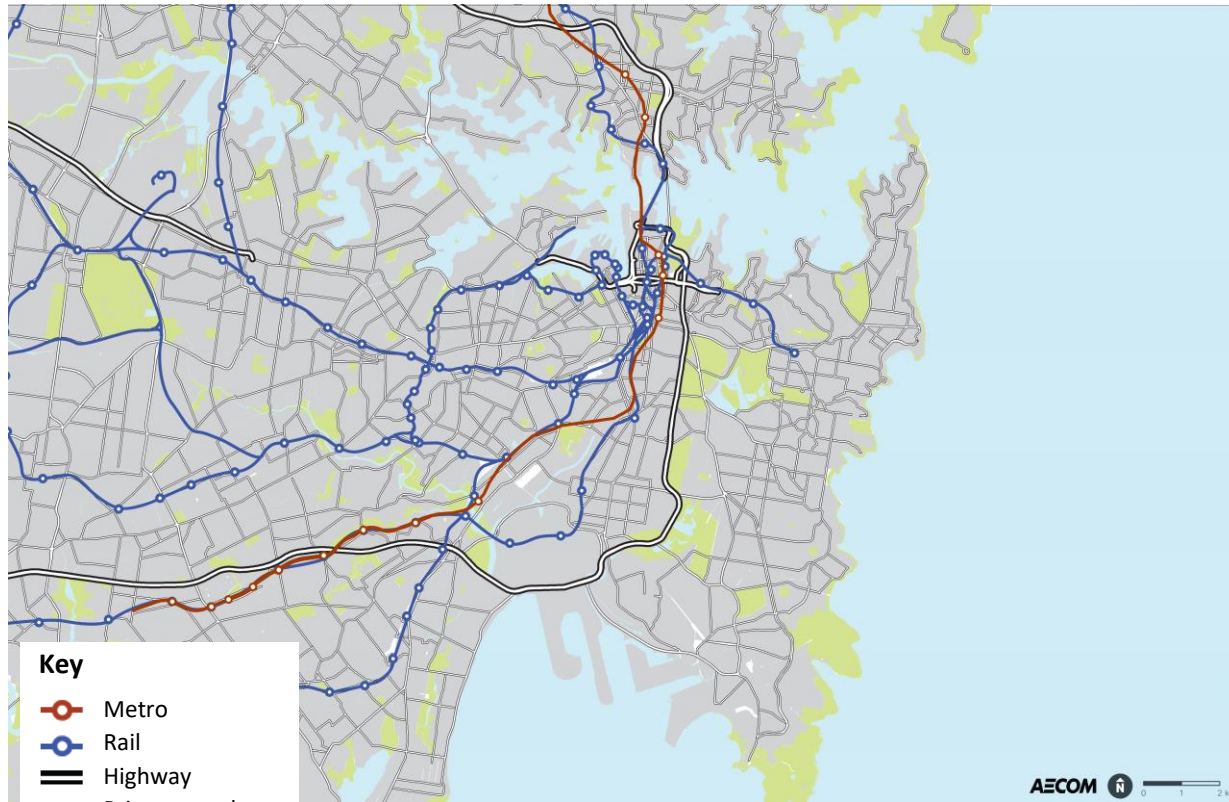

Daily new confirmed covid cases per million people

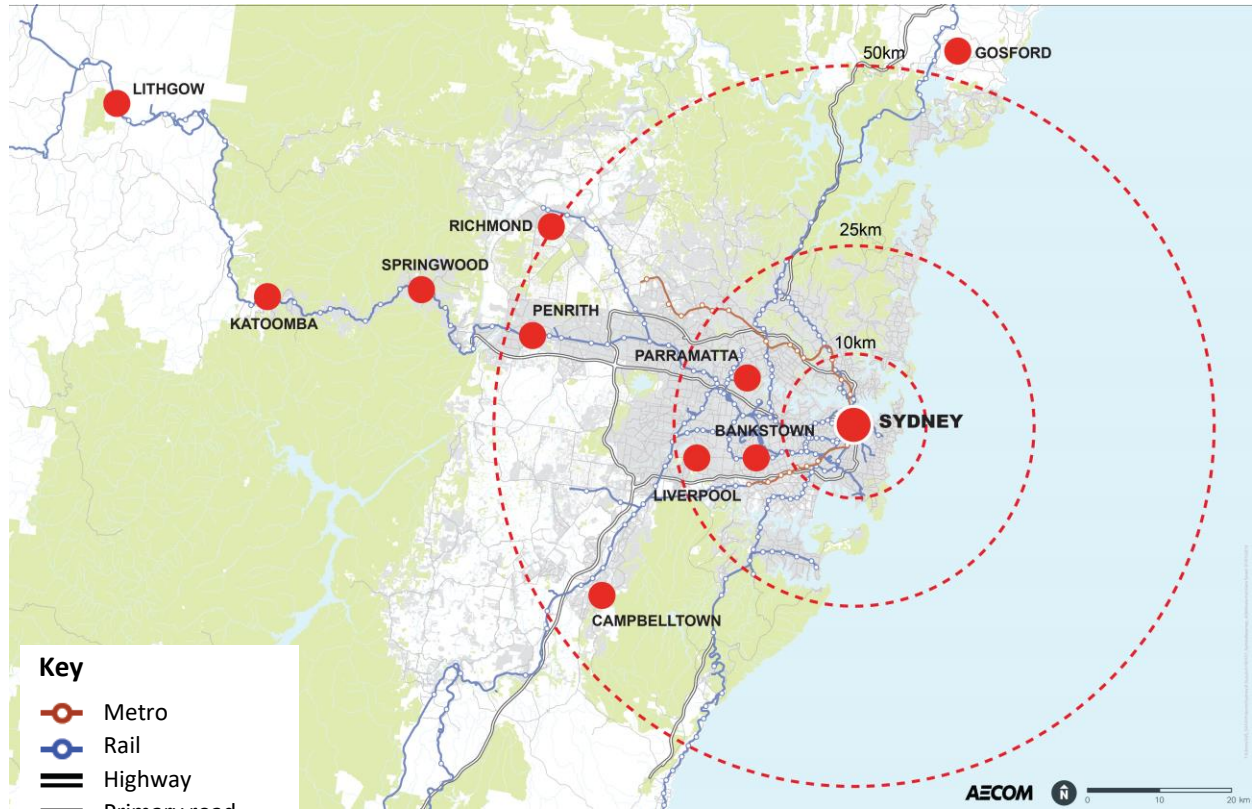

Scale Comparison - drawn at 1:75,000

Scale Comparison - drawn at 1:400,000

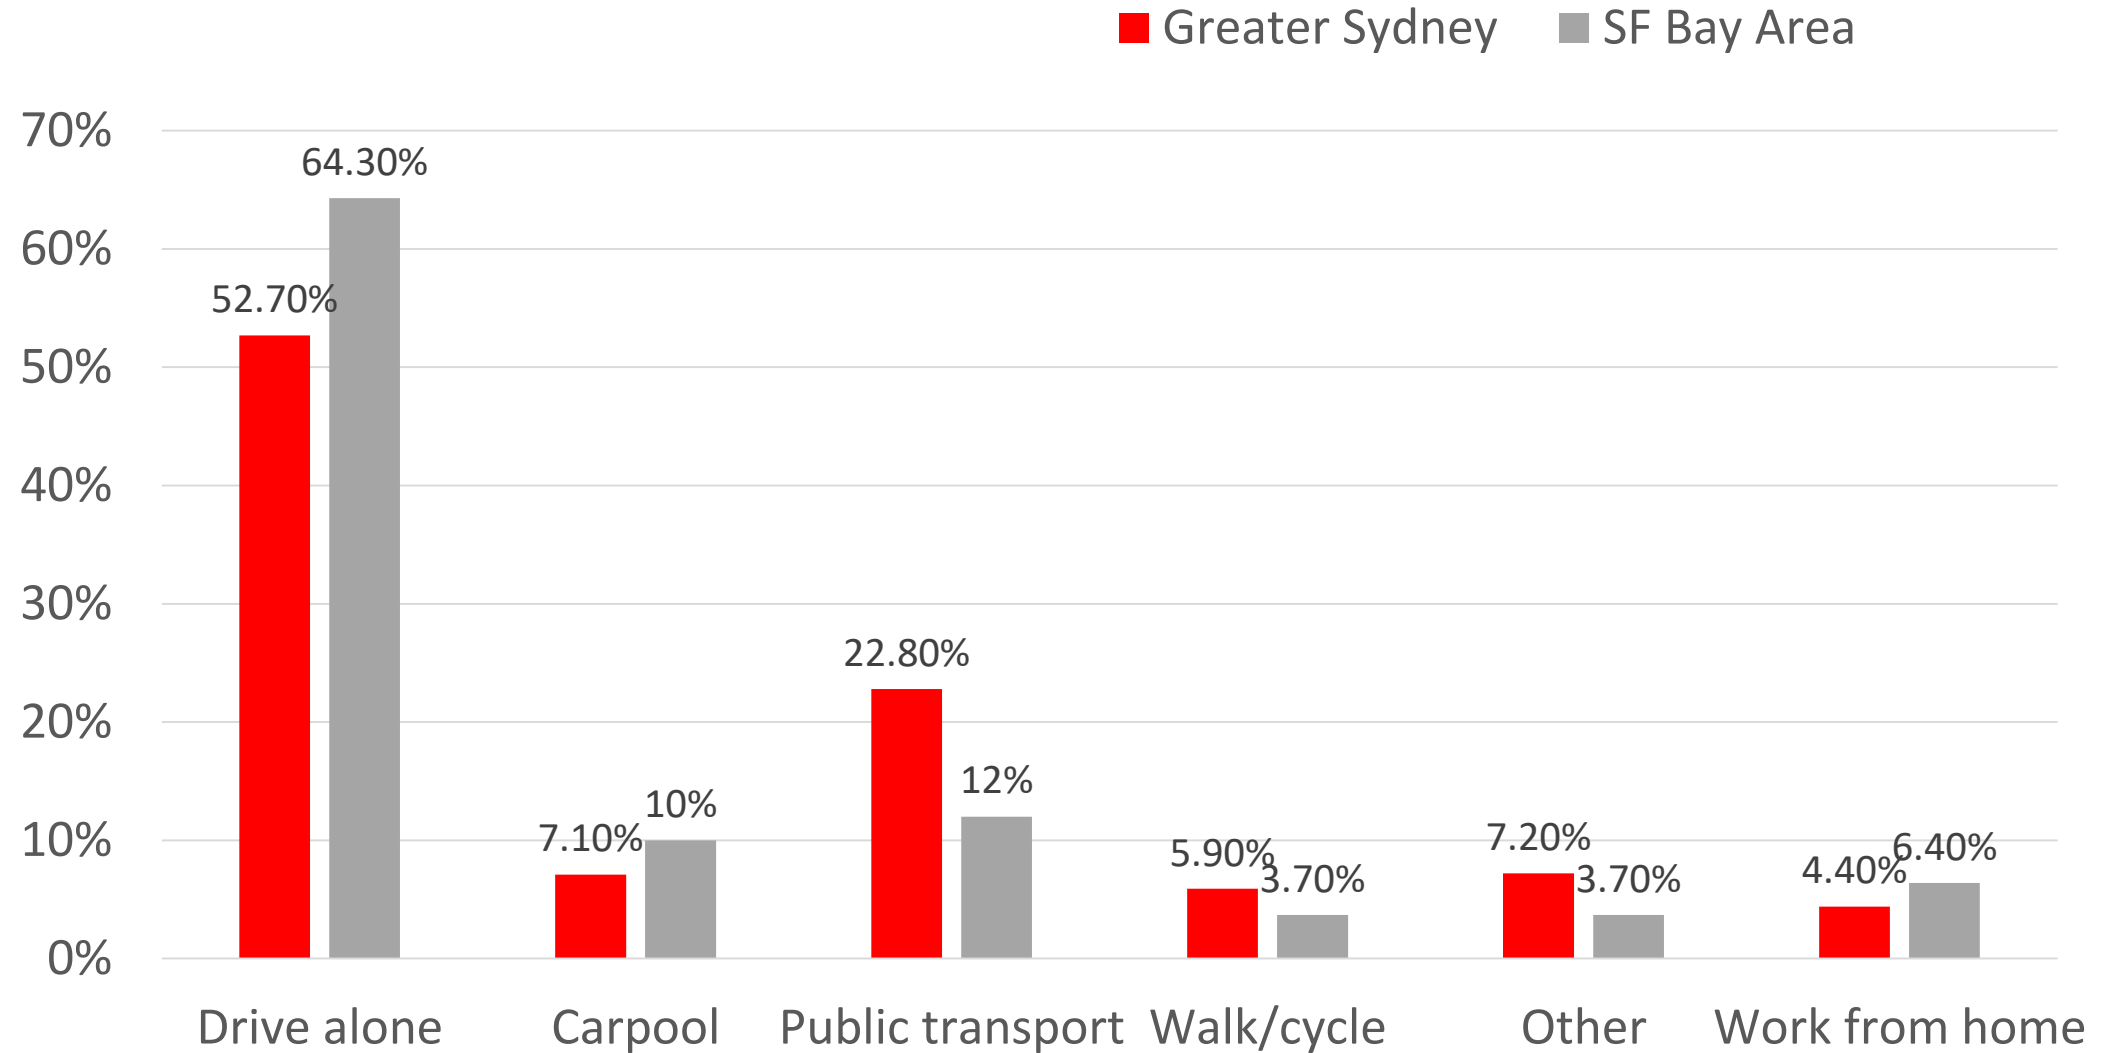

Mode share to work (pre-covid)

Median house price/median household income

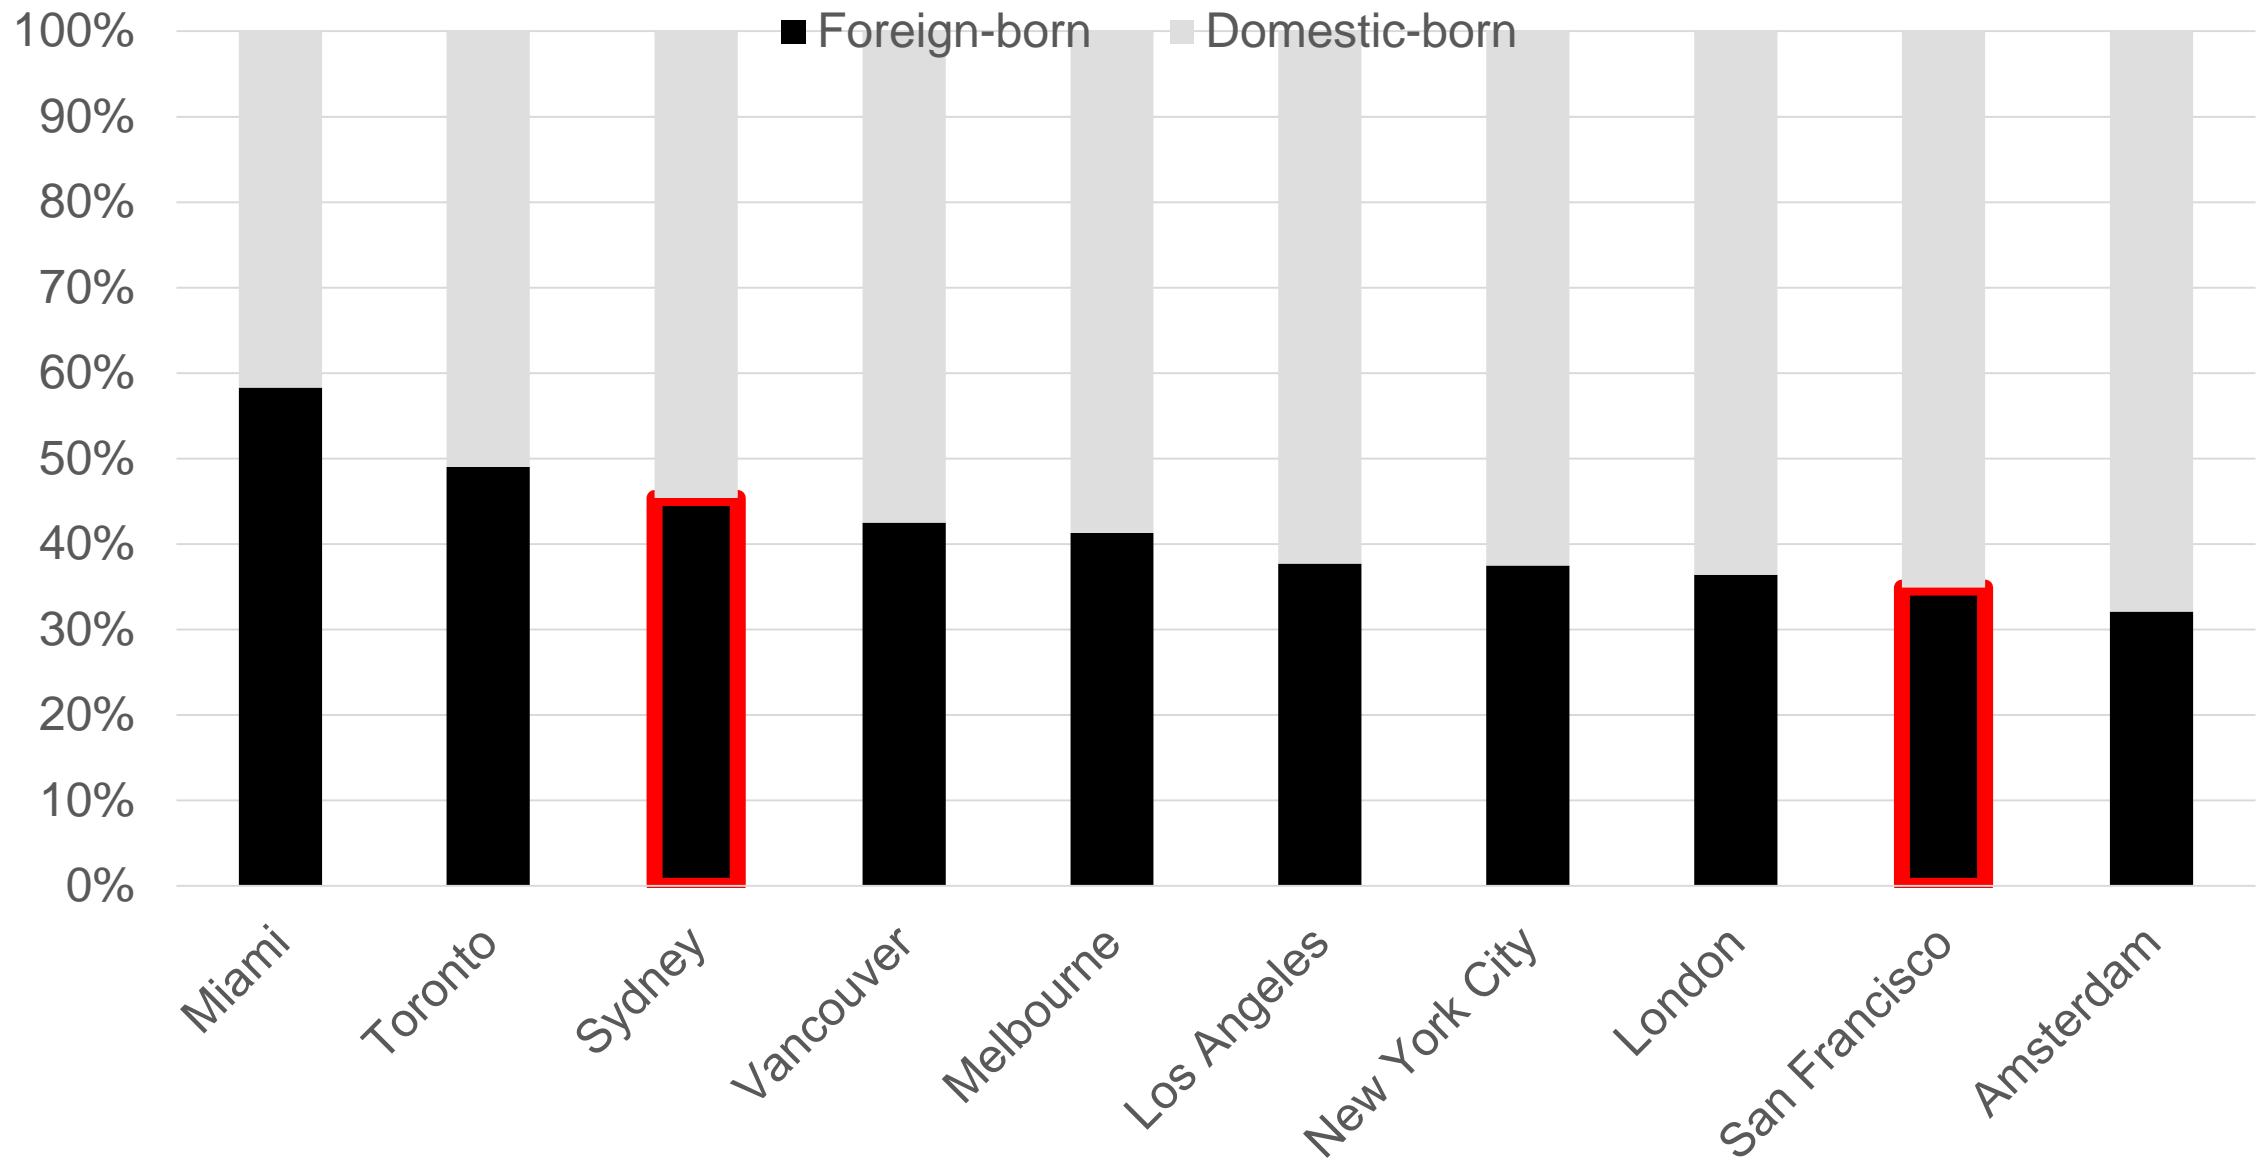

San Francisco housing policy

- ✓ Investing in affordable housing supply
- ✓ Rehabilitating old public housing sites
- ✓ Mandatory inclusionary zoning
- ✓ Rent control
- ✓ Public sites prioritised for deeper affordability
- ✓ A housing-first approach to homelessness

... so what's the problem?

Sydney housing policy

- ✓ State can/does override local zoning
- ✓ State can/does issue project approvals – most large developments use “state significant” approval process
- ✓ State funds massive public transport expansion + up-zones around stations
- ✓ Public transport agency is developer around its own stations
- ✓ Tolerance for significant scale changes in building heights
- ✓ No expensive “public benefits” contributions from

Comparing homelessness

	Greater Sydney	SF Bay Area
Year of data	2016	2017
Total population	4,446,805	7,756,000
Unsheltered	2,240	18,894
Sheltered	53,683	9,306
Total homeless	55,923	28,200
% homeless who are unsheltered	4%	67%
Unsheltered per 10,000 total population	5.04	24.36

Reflections

- The institutional design of the democracy has a big impact on urban form and urban systems
- Australia does not ask its planning system to do the heavy lifting to fight inequality; that work is done by the rest of the social safety net, health care system, educational system, etc.
- Similar land use patterns to US cities coupled with more effective government = a doubling of the non driving mode share to work
- People still disagree strongly about most of the same things
 - One big difference is that fights about development and growth in Australia are more explicitly framed as debates about how much immigration to allow
