HOW WE MOVE

Domesticated Transport
- Car
- Bicycle
- Motorcycle
- Electric Car
- Steam-Powered Car
- Golf Cart

Evolution of the Foot
- Shoes
- Heelys
- Ice Skates
- Snow Shoes
- Stroller

Enabling Greater Mobility
- Prosthetic Leg
- Wheelchair
- Bicycle
- Dockless Bike Share
- Docked Bike Share

Two Wheels and a Motor
- Scooter
- Electric Scooter
- Hoverboard
- Electric Unicycle
- Electric Kick Scooter

Informal and Innovative
- Rickshaw
- Howdah
- Skateboard
- Electric Assisted Bicycle
- Dockless Electric Bike Share
- Docked Electric Bike Share
- Motorized Wheelchair

Human
- Human

- Segway
- Rickshaw
- Moped
- Electric Pocket Bike

Non-human
- Animal
- Other
- Horse
- Elephant
- Camel
- Reindeer
- Zipline

One Person
- Electric Car
- Rickshaw
- Electric Car Share
- Taxi

Flexible-routed
- Electric Car
- Car Sharing
- Ride Hailing
- Autonomous Vehicle

Many People
- Car
- Taxi
- Autonomous Vehicle
- High-Speed Rail

Fixed-route
- Cable Car
- Streetcar
- Suspension Rail
- Hybrid Rail
- Monorail
- Light Rail
- Metro
- Intercity Passenger Rail

Flexible Bus
- School Bus
- Bus Rapid Transit

For centuries, the gondola was a major means of transportation within the canals of Venice, Italy. Now it’s mostly a floating tour bus—although still charming—and now also available at the Hotel Venice in Las Vegas.

Its name originates from the Greenlandic word qajaq. The kayak has been around since the late 16th century but its form and function have been gradually optimized over the decades, resulting in kayaks made from fiberglass or rotomolded plastic; there’s even a foldable one.

There is a Reddit thread with a guy asking why he can’t commute from the east bay to San Francisco by jet ski. He got over 100 replies including, “What’s stopping you?”

A device worn on the back which uses jets of gas or liquid to propel the wearer through the air. Though the concept has been present in popular culture (Pulp magazines, James Bond, Star Wars, Minority Report) for almost a century, we are still waiting for what we were promised.

There is a Reddit thread with a guy asking why he can’t commute from the east bay to San Francisco by jet ski. He got over 100 replies including, “What’s stopping you?”

In hydroflying, water jet propulsion is used to create sustained flight where lift and movement are controlled by a person riding on a propulsion device. The Flyboard enables one to, well, flyboard.

A small commercial aircraft used for short flights on demand sounds futuristic but Merriam Webster points to 1919 as the first year the term was used.
